PROFESSIONAL SUMMARY

An experienced Full Stack PHP Developer with over 7 years of expertise in managing and developing end to-end web solutions. Excelled in both front-end and back-end development, with a strong emphasis on problem solving, strategic thinking, and delivering scalable, high-quality software. Throughout the career, managed to built a diverse range of applications, including FinTech systems, enterprise resource planning (ERP) solutions, and corporate platforms. Adept at leading cross-functional teams, both onsite and remotely, ensuring seamless collaboration and project delivery. My ability to think critically and adapt quickly allows me to navigate complex challenges, finding smart, efficient solutions that align with business goals. I thrive in dynamic environments, working with teams of various backgrounds and expertise, and I am committed to creating user-centric applications that not only meet client requirements but also exceed expectations. My leadership style focuses on fostering innovation, enhancing productivity, and ensuring successful project execution from inception to deployment.

WORK HISTORY

Backend Web Developer, 03/2024 - Current
Codelounge Technologies - Fintech

- Engineered FinTech ERP systems using Laravel 10+, applying PSR-12 standards and SOLID principles for scalable architecture.
- Built secure REST APIs with Laravel Sanctum and Passport for user access, third-party services, and microservices.
- Implemented parallel queue workers and scheduled background tasks using Redis, RabbitMQ, Horizon, and Supervisor.
- Configured CI/CD with GitHub Actions and automated Laravel deployments to AWS (EC2, S3, RDS).
- Managed billing modules using Laravel Cashier and Stripe APIs, incorporating subscription life-cycle hooks.
- Designed event-driven services using MongoDB for analytics, integrated webhooks, and async event listeners.
- Wrote feature tests with PHPUnit and documented APIs with Swagger for collaborative development.

Back-end Team Lead, 03/2022 - 03/2024
Manafa Technologies

- Structured database relationships in MySQL and MongoDB for client-facing dashboards and financial reporting modules.
- Delivered custom CLI tools using Artisan Commands for data imports, user operations, and admin jobs.
- Led backend ticket resolution, performance optimization, and logging strategy via Monolog and custom exception handling.
- Integrated advanced search filters and reporting queries for ERP modules using Eloquent and Query Builder.

- Worked closely with QA and PM teams in Agile sprints, triaging bugs, prioritizing deployments, and improving release cycles.
- Developed data visualization endpoints for admin analytics using Laravel's Resource Collections and JSON transformations.

Full Stack Web Developer, 01/2018 - 02/2022
Soft-Tech Technologies
- Built dynamic dashboards with permission-based controls using Laravel Gates and Policies.
- Created RESTful endpoints for bookings, feedback, and service scheduling.
- Used Laravel Collections for data processing, filters, and conditional data rendering on front-end.
- Deployed apps to LAMP stack environments and configured Nginx with SSL for multiple client instances

Full Stack Web Developer, 04/2021 - 06/2021
XEPOS Pvt. Limited
- Refactored monolithic PHP codebases into Laravel components and Blade views.
- Introduced route groups, middleware layers, and service bindings for maintainable business logic.
- Assisted with multi-store logic implementation and timezone-aware invoicing mechanisms.
- Customized invoice templates, payment validation routines, and business settings through dynamic configs.

CERTIFICATIONS

- AWS Cloud Developer Course, KPITB - 2021
- Essentials of Cyber Security & Vulnerability Assessment, KPCERC - 2019
- Network Penetration Testing, KPCERC - 2019

PROFESSIONAL AND TECHNICAL SKILLS

- **Languages Frameworks:** PHP (5–8), Laravel, JavaScript, JQuery, Nuxt.js, Vue.js, Vuetify
- **Databases:** MySQL, MongoDB, PostgreSQL, SQL Server
- **Cloud/DevOps:** AWS (EC2, S3, RDS), CI/CD (GitHub Actions, Jenkins), Redis, Nginx, Apache, Ubuntu
- **Tools:** RabbitMQ, Laravel Horizon, Supervisor, CRON Jobs, Git, Bitbucket, GitHub, GitLab, Swagger, Postman, PHPUnit

- **Front-End:** HTML5, CSS3, Bootstrap, FX Grid
- **Security:** Laravel Sanctum/Passport, Vulnerability Assessment, Penetration Testing
- **Testing:** Unit, Feature & Integration Testing, Laravel Dusk

TECHNICAL PROJECTS

- **FinTech ERP Platform:** https://sukuk.sa
- **Watt Audit System:** https://wattaudit.com
- **XEPOS POS System:** https://xepos.co.uk
- **University Accreditation:** https://nbeac.org.pk
- **Reservation & Massage System:** https://egyptamassage.com
- **Galaxy Travel ERP:** http://galaxyairservices.com
- **Survey Panel Management:** http://csrb.com.pk

- **Retail & Invoice Platforms:** Selly, Rafi & Co., Freight Management, Hajj & Umrah

CORE COMPETENCIES

- Backend Web Architecture & Design
- RESTful API Development & Integration
- Asynchronous Processing (Queues, CRON Jobs, Workers)
- High-Performance Laravel Applications
- MySQL & MongoDB Optimization
- Secure Role-Based Access Control (RBAC)
- Continuous Integration & Deployment (CI/CD)
- Agile Software Development Lifecycle (SDLC)
- Microservices & Modular Architecture
- API Testing, Debugging, & Documentation

PROFESSIONAL FUTURE PLAN

- Complete the **Laravel 8 Mastery** course and implement projects to boost performance.
- Earn the **Laravel Certification** from **Laracasts** and lead scalable Laravel projects to improve system performance.
- Mentor junior developers on **Laravel best practices**, attend **Laracon** conferences, and deliver workshops.
- Complete **PHP-based web apps** with high customer satisfaction and reduce load time through **Laravel optimization**.

EDUCATION

Bachelors: Computer and Software Engineering
COMSATS University Islamabad
